Summary

B.Sc. IT student and results-driven MERN Stack Developer with a proven track record of building production-ready applications. Developed a Student Management system used by **20+ daily active users** and a scalable Furniture E-Commerce platform with Google OAuth. Experienced in optimizing frontend performance (30% reduction in load times) and deploying robust full-stack solutions

Education

Bachelor of Science in Information Technology (B.Sc. IT) 07/2024 – 04/2027

Vivekanand Education Society (VESIT)

Core Coursework: Specialized in Software Development, Database Management, and Web Technologies, providing a strong foundation for full-stack engineering.

Skills

Frontend

React.js, HTML5, CSS3, JavaScript (ES6+)

Database

MongoDB,SQL

Deployment

Cloudflare Pages, Render

Backend

Node.js, Express.js

Tools & Technologies

REST APIs, Cloudinary, Google Authentication, Redux

Project

Personal Project

09/2025 – 11/2025

Student Management Platform | MERN Stack

- **Live Demo:** student-2.pages.dev
- **Github Repo :** <https://github.com/Gautam69-Coder/Student-2/>
- Designed a centralized dashboard for educational data management, utilizing **React.js** for dynamic state updates.
- **Currently serving 20+ daily active users**, providing a centralized dashboard for real-time educational data management using React.js.
- Implemented full **CRUD (Create, Read, Update, Delete)** functionality for managing student records with real-time database synchronization via **MongoDB**.
- Architected a modular backend structure to handle data validation and error handling, improving system reliability.
- Optimized frontend performance by implementing **React Hooks** and efficient component structures, reduced load time by 30%

10/2025 – 12/2025

Furniture E-Commerce Platform | MERN Stack

- **Live Demo :** 5-furniture.pages.dev
- **Github Repo :** https://github.com/Gautam69-Coder/5_Furniture
- Developed a full-stack e-commerce application featuring a **responsive UI** and seamless user experience across all devices.
- Engineered a **secure authentication system** using **Google OAuth 2.0**, reducing login friction for new users.
- Built and integrated **RESTful APIs** using Node.js and Express to manage complex product catalogs, shopping carts, and user profiles.
- Implemented image handling via **Cloudinary API** for optimized storage and fast loading of high-resolution product images.
- Deployed the frontend on **Cloudflare Pages** and backend on **Render**, ensuring 99.9% uptime.

Experience

Syncedge

07/2025 – 09/2025 | Mumbai

Junior Frontend Developer

- **Full-Stack Development:** Contributed to end-to-end web development using **React.js** for responsive UI components and **Node.js/Express.js** for backend support.
- **UI/UX Collaboration:** Partnered with team members to deliver user-focused solutions, participating in technical discussions and code reviews to ensure quality.
- **Agile Workflows:** Engaged in sprint planning and real-world development cycles to deliver scalable JavaScript-based applications.

Training / Courses

Self-Learning & Project-Based Training (MERN Stack)

Complete Mern Stack Bootcamp

- Hands-on learning through real-world projects
- Focused on full-stack development and deployment
