Summary

Motivated and detail-oriented second-year Information Technology student seeking an internship opportunity to apply and enhance my skills in web development and database management. Proficient in JavaScript, HTML, CSS, and SQL, with a strong eagerness to learn, contribute to real-world projects, and further develop technical and problem-solving abilities in a professional environment.

Education

Bachelor of Science in Information Technology (B.Sc. IT) 07/2024 – 04/2027

Vivekanand Education Society (VESIT)

Core Coursework: Specialized in Software Development, Database Management, and Web Technologies, providing a strong foundation for full-stack engineering.

Skills

Languages — HTML CSS JAVASCRIPT

DataBase — SQL

Project

10/2025 – 12/2025

E-commerce Website Clone

- Developed a responsive e-commerce website clone using HTML, CSS, and JavaScript
- Designed and implemented product listing pages with clean and user-friendly UI
- Built interactive components such as navigation menus and dynamic content display
- Ensured cross-browser compatibility and mobile responsiveness for better user experience

Performance & Achievements

- Improved page load performance through optimized CSS and efficient JavaScript usage
- Successfully replicated core features of a real-world e-commerce platform
- Strengthened front-end development skills and understanding of responsive design
- Demonstrated ability to build and structure a complete web project independently

Experience

Syncedge

07/2025 – 09/2025 | Mumbai

Junior Frontend Developer

- Front-End Development:** Built responsive and interactive web interfaces using HTML, CSS, and JavaScript
- Database Management:** Applied SQL for basic database operations such as creating, retrieving, and managing data
- UI Development:** Focused on creating clean, user-friendly layouts with attention to design and usability
- Learning & Collaboration:** Actively improving technical skills through practice, projects, and participation in discussions
- Development Approach:** Familiar with basic development workflows and continuously learning to build efficient and scalable web applications

Training / Courses

Self-Learning & Project-Based Training (MERN Stack)

Complete Mern Stack Bootcamp

- Hands-on learning through real-world projects
- Focused on full-stack development and deployment

Languages

English: Professional Working Proficiency

Hindi: Native / Fluent
